

Deflation Instructions

WARNING READ INSTRUCTIONS CAREFULLY BEFORE USE

1. Detach the guide ropes from the stakes and remove the side wall stakes.

2. Ensure the plastic caps are placed over the end of the screw in stakes and wrap in the bubble wrap.

3. Neatly tie up the green guide ropes.

4. Detach the sandbags from the gazebo legs.

5. Ensure area is clear of all persons. Ensure area is dry and clean. Unscrew all valves to deflate gazebo. Be careful as gazebo will deflate quickly once valves are open.

6. Unzip all sides and canopy. Remove all the air from the tubes.

7. Carefully push air from the top of the frame downwards towards the open valves on the legs. Bring all the legs onto one side, fold the frame in half and half again. Fold downwards from top and secure with the strap provided. Put the gazebo frame in the large bag.

8. Carefully push air from the end of the canopy without the valves. Fold from the end without the valves and secure with the strap provided. Put the canopy in the smaller bag. Fold each side inward and put in the canopy in the smaller bag.

9.
